YOUR SMART PARTNER FOR
KNOWLEDGE INNOVATION
**FUNDACYT-PCTEX**

**Key Figures**

- **14,000m²** Infrastructures
- **51** High qualified employees
- **4,028 MM €** Annual budget
- **+90** Hosted companies (+ 50 Technology Based Enterprises)
- **+30** Projects
- **106** Aided companies in 2016
- **20** Effective exchanges between SMEs and Research Centers in 2016
**FUNDECYT-PCTEX**

**Operational Areas**

- Gate to Europe
- Exchange of Science, Technology and Knowledge
  Support for participating in European Project
- Management of Innovations Spaces
- Social Innovation
- Attraction, Retention, and Development of Talent
- Public Lab
- Innovative Enterpreneurship
  Based in Technology and Knowledge
More than 20 years of experience managing projects on science, technology, business, public lab and social innovation.

52 projects in the last three years: Two-thirds of them, with an international scope.
Innosup 05: Fundecyt-Pctex Previous experience

699631-NETIM
An effective mechanism for monitoring policies for innovation and designing a tool for collecting systematically information without excessive costs and through procedures easy to implement.

It is targeted at organisations such as innovation agencies, regional and national authorities and similar organisations, involved in monitoring and evaluation of public policies for innovation.

699640-GIDDB
“New practices of Grassroots Innovation for Demand Driven Businesses” (short GIDDB) was a 9-months peer-learning project aimed at discussing and identifying possible policy support mechanisms for improving innovativeness in SMEs primarily founded and managed by young entrepreneurs (18-35 years of age) by applying a grassroots approach.

730826 - SME Sealing
The Seal of Excellence is a European initiative aimed at mainly at regional and national level. It offers a gateway to companies and organizations across Europe who apply for the Horizon 2020 Programme and despite of meeting all the stringent thresholds of the calls, are not funded due to the lack of available budget. This paper aims at using peer learning advanced methodology together with the current tools from the lean start-up methodologies to develop and test different approaches to the valorisation of the Seal of Excellence for the SME instrument phase 2 within a small consortium of national innovation.

730828 - Peer for Excellence
Peer for Excellence suggests options to implement new financing mechanisms (public and/or private), that will help all European, national and regional funding agencies to harness the potential of the distinction provided by the SME instrument “Seal of Excellence” to successfully fund high impact innovation projects.
Main Interest in Interreg Europe

Cooperation on **Green and Circular Economy**, covering:

- Activities ranging from emissions to renewable energies,
- from recycling to waste of food,
- from the markets of secondary materials to the creation of new jobs and the increase of competitiveness.
Scenario Extremadura: Smart Specialization Pattern

- **Eco-design and New Materials**
- **Clean Energies**
  - Manageability, energy efficiency and thermic, photovoltaic, hydraulic, biogas and biomass solar generation technologies.
- **Tourism**
  - Nature, culture, gastronomy, health and experiential tourism.
  - This area includes cultural and creative industries, trade and hotel industries, Chemistry, Biochemistry and Materials.
- **Health**
  - Tele-health, tele-care, food-health, monitoring of chronic patients, personalized medicine, regenerative medicine and reproduction.
- **Food and Agriculture**
  - Agrotechnologies, veterinary and food sciences and technology.
- **ICT**
  - Data management, cloud computing, free open software, mobile networks and systems, Contents, Cybersecurity and digital trust, Internet and Social Networks.
- **Software Engineering**
- **Agronomy, Biology and Ecology**
- **Electronics and Automation**
Our Relevant Experience in INTERREG

INTERREG 1VC
DESUR
To improve regional policies in order to promote responsible innovation in SMEs throughout the exchange of experiences among all the partners.

DANTE
To promote a new regional policy approach to designing a knowledge-based plan for the tourism sector by enhancing the role of ICT in tourism industry in rural and mountain areas.

INNOLINK
To focus on regional policies and practices for the diffusion of innovation and intends to identify and exchange good practices related to this theme.

DE-LAN
To share knowledge and experience across Europe to create new types of digital networks for businesses.

B3 REGIONS
To create an European network made up of 16 public authorities representing 8 different Member States, aiming to improve their innovation policies by transferring their best practices related to regional implementation of ICT connections into 2007-2013 Structural Funds programs.

INTERREG IVB - SUDOE
SILVER SUDOE
To increase the competitiveness of companies in the participating regions, looking at the innovation resources through a better integration of advances in research and development.

CREANET 2.0
To develop a support system about creativity and networking among entrepreneurs and enterprises.

FOOD SME HOP
To focus on mentoring agritourism SMEs on innovation processes for the production of healthy products, covering both technological and management innovation aspects.

CREA BUSINESS IDEA
To establish a Virtual Cluster of Business Creativity to implement tools and methodologies oriented to creativity as base for ideas valorisation to create new enterprises and consolidate enterprises.

INTERREG IVB - POCTEP
MITTIC
To promote economic development and employment through competitiveness in strategic and traditional sectors.

RITECA
To increase the competitiveness of companies in the participating regions, looking at the innovation resources through a better integration of advances in research and development.

INTERREG IID - SUDOE
TECNOPRENDRE
To bring together and coordinate information on the various regional initiatives so that technological entrepreneurs had first hand information on procedures and financing for the implementation of their business plans.

LIMEX
To evaluate the potential of public organizations and to offer to local and regional authorities a concrete strategic action plan. This project allowed the exchanging of "know-how" between participants, in terms of free software and high debt, with an added-value for public organizations.

INTERREG III C SOUTH
ESAVENT to provide partners with alternatives in order to methodologically ensure their ICT strategies, and to support themselves to ensure independence on the software market, due to the flexibility and adaptability of FLOSS.

INTERREG III A
KOGNOPOLIS
To promote knowledge management practices among institutions belonging to the cities included in it and to conduct relevant scientific studies to achieve the collective advancement of knowledge.

FUNDAR
To go into detail about knowledge and promote the transfer of knowledge in the field of Social Responsibility through cross-border and cross-sectoral cooperation so that to strengthen the socio-economic development.

INTERREG EUROPE
INTRA
Focuses on the role of public authorities in creating internationalization services to support the competitiveness of the regional economies, highlighting the importance of quadruple helix to bring together universities, business, civil society and authorities to guarantee a wider acceptance of the project’s results.

SYMBI
Will contribute to improve the implementation of regional development policies related to the promotion of industrial synergies and circular economy from participating countries faced to policies alignment with the Circular Economy strategy of the EU to transform Europe into a more competitive resource-efficient economy.

BEYOND EDP
is a European INTERREG project, formed by 11 partners from 9 countries, which addresses the inadequacies in the design and implementation of innovation policies. It aims to strengthen the entrepreneurial discovery process in Europe, boosting the Regional Innovation Smart Specialisation strategies (RIS3).

INTERREG V A
España Portugal (POCTEP) 2014-2020
CETESIS will develop a distributed model for advanced services for entrepreneurship and innovation in SME with the aim to contributed to high impact entrepreneurship and the competitiveness of EUROACE territory.

DEGREE
To create a Cross-Border Center of ECODESIGN based on the existing resources and collaboration in network among existing stakeholders in order to create and promote the development of ideas and researches related to Ecodesign which satisfy the socio-economic sectors related to this area.

EUROACE, LERA
will develop a common methodology for the creation of a unique ecosystem for EUROACE Region which stimulates the entrepreneurship and acceleration of knowledge based business projects. This project will also foster the entrepreneurship culture in young people. Trying to transform the EUROACE Region in an important area for talent retention, attraction and development.

INNOCASE
to foster the business sector through the creation of synergies between companies and R&D organizations which allow to carry out activities of transfer and validation of products and services using open innovation and to promote the entrepreneurial discovery process in the smart specialization areas of EUROACE region.

EFES
to promote the entrepreneurship and social economy for the development of new projects, companies and sustainable employments in the euro region as a sustainable and integrative model. This project will also foster collaborative environments for the creation and consolidate new business models which generate social transformation, impact and quality employment.
